'The Theory of Algebraic Numbers on JSTOR

December 1st, 2019 - Consider the ring of all algebraic integers and let us try to model a theory of factorization in this ring after the pattern of Chapter I We might say that α divides β written $\alpha | \beta$ if $\beta = \alpha \gamma$ if α is an algebraic integer α is a unit if α divides 1 α is a prime if it is not zero or a unit and if any factorization $\alpha = \beta \gamma$ into integers implies that either β or γ is a unit" ***Carus Mathematical Monographs***
