'european journal for person centered healthcare

May 29th, 2020 - family centred care is a ubiquitous term in paediatric health facilities it

means that an admitted child can never be treated as a single individual patient that the family is the unit of care as the parents and family are central to the child s wellbeing especially during traumatic experiences there is no rigorous evidence that family centred care works but qualitative research is drawing out some grave concerns with how it is implemented"

who framework on integrated people centred health services
June 1st, 2020 - adopted with overwhelming support by member states

**at the world health assembly in may 2016
the framework on integrated people
centred health services ipchs aims to
address these issues by calling for a
fundamental shift in the way health
services are funded managed and
delivered the framework presents a pelling
vision of a future in which all people have
access to health services that are
provided in a way that are coordinated
around their needs respects their
preferences and are'**
