## **3 4 probability trees module 3 probabilistic models**

June 6th, 2020 - and the probability that you don't stop infringing is just that you go from the red to the red to the red and that probability would be  $0.9 \times 0.85 \times 0.8$  and if you do 1 minus that you're going to get the same number the 0.388 so that's an example of a probability tree a useful device when you have a sequence of events'
