*hubble deep space quest makes
surprising find in the early*

*June 4th, 2020 - new results from the
nasa esa hubble space telescope suggest
the formation of the first stars and
galaxies in the early universe took place
sooner than previously thought a
european team of astronomers have
found no evidence of the first generation
of stars known as population iii stars as
far back as when the universe was just
500 million years old'*
