A practical approach to TCP high speed WAN data transfers

November 19th, 2019 - The author presents a generic architecture for interconnecting LANs local area networks through the ISDN integrated services digital network bearer services particularly the frame relay bearer service The architecture is derived from the IEEE 802.1 MAC medium access control bridge and ISDN frame relay standards'

'Our Team

December 2nd, 2019 - Steve's communication skills range from interacting with customers to influencing executives to technical design with engineering departments and development expertise Steve has a Bachelor of Science from the University of Manchester England has authored ISDN Design A practical approach and published many articles'

'Performance design criteria for digital satellite links in

July 17th, 2019 - The commonly used FECs namely rate 1/2 convolutional its punctured version rate 3/4 convolutional and rate 7/8 BCH are used as illustrations A new theoretical approach and measured data on practical use are presented and their impact on system design in the 11-14 GHz region is discussed'
