**'geometry of algebraic curves
volume i e arbarello m**

*April 14th, 2020 - many long
standing problems have been
solved using the general
techniques developed in algebraic
geometry during the 1950 s and
1960 s additionally unexpected
and deep connections between
algebraic curves and differential
equations have been uncovered and
these in turn shed light on other
classical problems in curve
theory'*

**'brill noether theory
April 15th, 2020 - in the theory
of algebraic curves brill noether
theory introduced by alexander
von brill and max noether is the
study of special divisors certain
divisors on a curve c that
determine more patible functions
than would be predicted in
classical language special
divisors move on the curve in a
larger than expected linear
system of divisors'**
