programming the universe
May 27th, 2020 -

programming the universe a
quantum puter scientist takes
on the cosmos is a 2006
popular science book by seth
lloyd professor of
mechanical engineering at
the massachusetts institute of
technology the book
proposes that the universe is
a quantum puter and
advances in the
understanding of physics
may e from viewing entropy
as a phenomenon of
information rather than
simply thermodynamics
lloyd also postulates that the
universe can be fully
simulated using a quantum
puter however'
