April 29th, 2020 - The emphasis of the book is on the putational aspects as well as presentation of mon analytical tools for systems involving random

signals The book covers random processes
stationary signals spectral analysis estimation
optimization detection spectrum estimation
prediction filtering and identification'

'Reliable fuzzy control for uncertain vehicle suspension

May 1st, 2020 - The reliable control issue for uncertain suspension systems with random incomplete signals and sensor failure has been studied. The fuzzy model has been employed to cope with uncertainties that exist in suspension systems. By introducing two independent Bernoulli random distribution processes'
