Full text of Weekly
World News They knew
thousands recently
became aware of the
of years ago that
prolonged sun's
harmful rays exposure
would cause problems. But
while ancient Egypt
knew that prolonged
exposure to the sun's
rays could be harmful,
it was not until the
19th century that
scientists discovered
that the sun's rays
could cause skin
cancer. This discovery
led to the development
of sunscreens and
other protective
measures. Today, we
know that the sun's
rays can be harmful,
but we also know that
they can be beneficial.
So, it's important to
use sunscreen and
other protective
measures when you're
out in the sun.
