CFSPH

December 21st, 2018 -

Avian influenza viruses are highly contagious extremely variable viruses that are widespread in birds particularly wild waterfowl and

shorebirds" In the role of the Middle East and north Africa

December 21st, 2018 - 100 years have passed since the first well documented influenza pandemic of the 20th century Today the majority of the influenza virus burden is known to be caused by two main types of influenza virus? type A and type B Human influenza A viruses generally stem

from birds and swine
whereas influenza B
viruses do not have a
known animal reservoir
and simply circulate
among human
beings"
