**'the arctic amp global warming greenpeace usa**

May 29th, 2020 - and with the world growing warmer arctic ice is melting even faster threatening their safety and way of life already in the past 30

---

**years we've seen areas of arctic sea ice melt that are larger than Norway, Sweden, and Denmark combined. Why the Arctic matters for global warming: nowhere is climate change more obvious than in the Arctic.**

**May 30th, 2020 - the Arctic includes copious natural resources: oil, gas, minerals, fresh water, fish, and if the subarctic is included, forest. To which modern technology and the economic opening up of Russia have given significant new opportunities. The interest of the tourism industry is also on the increase. The Arctic contains some of the last and most extensive continuous wilderness areas in the world.**

**'Arctic Monkeys'**

May 30th, 2020 - The Arctic Monkeys were formed in 2002 by friends Alex Turner, Matt Helders, and Andy Nicholson. Turner and Helders were neighbours and close friends and met in Nicholson in secondary school. Turner, who had grown up in a musical household as his father was a music teacher, played guitar in the then instrumental-only band with Helders on drums, Nicholson on bass, and a new band member Jamie *"What's Puttin' Up to in the Arctic the Hill"*

*May 29th, 2020 - there has also been build up after build up in Moscow's Arctic military drills last year. They involved 300,000 troops, 1,000 aircraft, 80 ships, and 36,000 tanks. The largest such exercise.*

**'What is there to explore in the Arctic circle'**

*May 28th, 2020 - the Arctic circle is an invisible ring on Earth encompassing the Arctic region. The Arctic circle lines the boundary of an area where the sun does not set on some days in summer, an Arctic phenomenon called the midnight sun, and does not rise in winter, which is called the polar nights.* **Bad news alarmists: official data reveals Arctic sea ice**

**May 30th, 2020 - Arctic sea ice extent in January 2020 is sitting above levels observed in the years 2019, 2018, 2017, 2016, 2015, 2012. Record low extent 2011 and 2010. Can you imagine the likes of the Guardian for example ever running with this? The source of the data isn't some hokey, pokey conspiracy site. It's America's NSIC, who boast being backed up by NASA and they have satellites and'**
