'adaptive control

June 7th, 2020 - adaptive control is the control method used by a controller which
must adapt to a controlled system with parameters which vary or are initially
uncertain for example as an aircraft flies its mass will slowly decrease as a
result of fuel consumption a control law is needed that adapts itself to such
changing conditions'

'adaptive filtering prediction and control by graham c

May 18th, 2020 - adaptive control when there may be disturbances and the models are
not pletely specified we shall emphasize the latter type of control problem in this
book from the discussion above it can be seen that underlying each of the problems
of adaptive filtering prediction and control there is some form of parameter
estimator''**adaptive filtering and change detection wiley online books**

*October 1st, 2019 - adaptive filtering is a branch of digital signal processing
which enables the selective enhancement of desired elements of a signal and the
reduction of undesired elements change detection is another kind of adaptive
filtering for non stationary signals and is the basic tool in fault detection and
diagnosis'*
