## **usagold discussion january 2000**

**May 13th, 2020 - that number equals 3 3333 billion ounces of gold that theoretically 1t could buy 3 3333 billion ounces equals approx 104  
000 tons using 32 000 ounces per ton of gold since that is approx 26 000 tons short of the entire worlds supply of gold i would say that were  
these folks interested in buying up that much gold the price would rise slightly"britannica**
