## **risk right**

January 28th, 2020 - getting risk right is an excellent book which should be of interest not only to scientists and science journalists but also to members of the public who want to increase their ability to make sense out of the frequently confusing and often contradictory barrage of media reports about potential

---

---

environmental health hazards'  
**'understanding chemical  
hazards and risks**

June 5th, 2020 - there might be a very low risk of getting hit while crossing with the light in a crosswalk but a high risk while jaywalking so to understand risk we need to know both what the inherent hazard is getting hit by a car and the degree of exposure

---

---

the number of cars on the road once we understand risk we can also reduce or manage it for" **getting risk right understanding the science of elusive**

May 28th, 2020 - drawing on recent systematic critiques of biomedical research and on insights from behavioral psychology getting risk right examines factors both internal

---

---

and external to the science  
that can influence what  
results get attention and how  
questionable results can be  
used to support a particular  
narrative concerning an  
alleged public health threat in  
this book kabat provides a  
much needed antidote to what  
has been called an epidemic  
of false claims'
